AWARD Word Munchers™

Ages 6 - Adult

Hungry Munchers are on the loose, making their way around a board by feasting on simple words containing target vowel sounds. But without your child's expertise, the Munchers' usually healthy appetites will be ruined by those menacing characters, the Troggles. These troublemakers will stop at nothing as they try to spoil the Munchers' fun, so children need to be constantly on their guard. Kids will enjoy all the phonics challenges they'll face with this best-selling winner of the *Parents' Choice Award* and *InCider Magazine's People's Choice Award!*

AWARD Spellevator™

Ages 6 - Adult

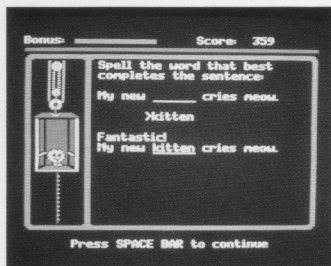

"Dusters" are on a mission to reach the top floor of the Speller Hotel, and they need your children's help. This intriguing assignment is filled with surprises that'll challenge kids' spelling skills and keep them on the lookout for the unexpected. Kids maneuver Dusters through the hotel to collect letters from scattered words, and then unscramble those letters to solve mystery words. To move to different floors, Dusters have to ride elevators that won't always stop on the floors they want to explore. And lurking around the elevators are devilish vacuum cleaners, who want to stop the Dusters and kids from ever leaving the first floor.

"Spellbinding" adventure for spellers of all ages with this *Media & Methods Award*-winner!

Mathematics

Number Munchers™

Ages 8 - Adult

Great excitement and mathematics fun are in store for your children as they help Munchers hunt for numbers or numerical expressions—factors, primes, multiples, equalities, or inequalities—while watching out for the dreaded Troggles. As with all *Munchers* packages, management options provide a high degree of control, and enable you to set the program for different mastery levels. A best-seller and award-winner from *Parents' Choice*, *InCider Magazine*, and *Media & Methods*.

Fraction Munchers™

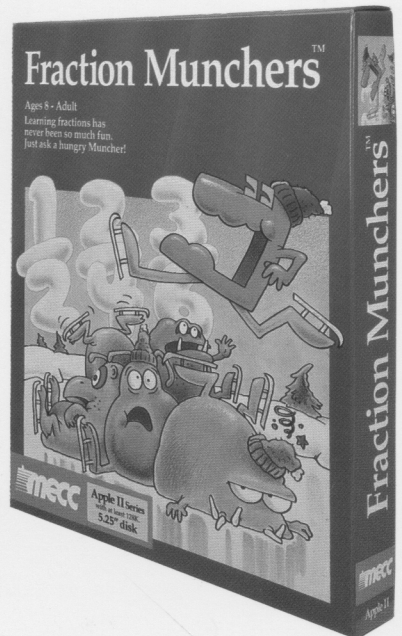

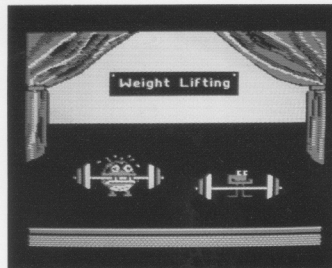

Ages 8 - Adult

The newest Munchers in the series! Once again, the gang is here to help your children chase away their fraction blues. Although the fun-loving Munchers are champion chompers, they aren't always very adept at sidestepping the menacing Troggles and have to rely on your kids to come to their rescue. Children practice and refine their math skills as they search with the Munchers for various types of fractional numbers, equivalent fractions, and expressions using fractions. This fast-paced escapade is an exciting way to motivate children to learn fractions! A winner of awards from *Parents' Choice*, *Media & Methods*, and *InCider Magazine*.

World GeoGraph™

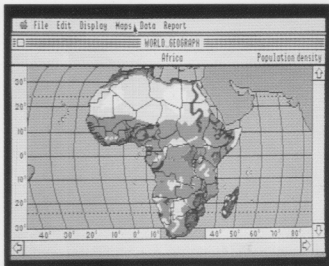

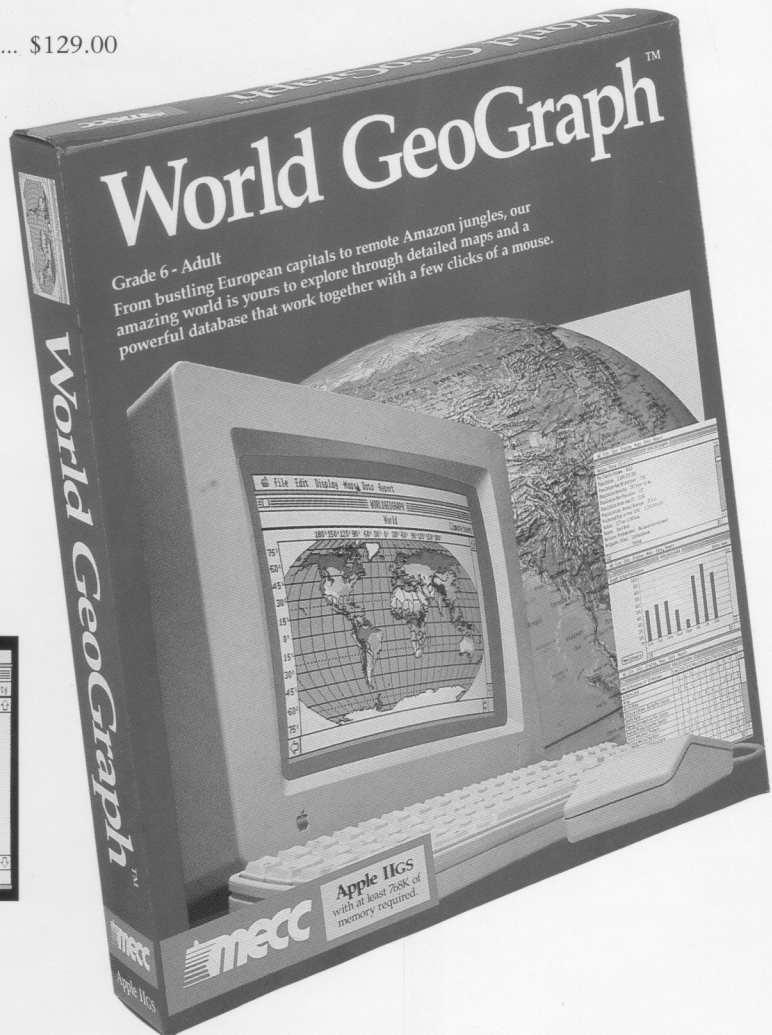

Ages 11 - Adult

Acquiring world knowledge is a big job—but *World GeoGraph's* "Living Map" will help make it fun. More than 40 colorful, accurate on-screen maps work interactively with a 55-category database of 177 nations. You can see the results of your exploration in either database or graphic form. Research and learn about the characteristics of many countries, observe patterns, and recognize relationships. Or just explore the database and maps at your leisure and get acquainted with the world around you. Winner of the 1989 Software Publishers Association *Critic's Choice Award for Best Education Product*.

The Oregon Trail™

Ages 10 - Adult

Load up your gear and prepare yourself to take on the pioneer lifestyle in this adventurous, realistic computer simulation! As part of a new generation of "Old West settlers," you'll participate in many exciting experiences along the trail, such as hunting wild buffalo, rafting down treacherous rivers, and trading for essential supplies. Every move you make has a direct impact on your pioneer "family," so you must weigh your decisions carefully. Their survival—and yours—is dependent on your problem-solving skills. Now, for the first time, this popular product is also available in an MS-DOS version. The original computer simulation of this Old West adventure and a winner of the *A+ Magazine*, *InCider Magazine*, and *Parents' Choice Awards!*

Jenny's Journeys™

Ages 10-15

While visiting their Aunt Jenny, kids use her car to explore the computer metropolis of Lake City. At first Aunt Jenny will be in the car with them, but as they advance, they'll be on their own. Along the way, while using map-reading skills, kids will learn to find locations, use a map index, and plan efficient travel routes. To add to the realism, kids must even maneuver through various construction detours. With *Jenny's Journeys*, you'll help put your children on the right road!

The Market Place™

Ages 8-14

With this package, budding entrepreneurs set up their own businesses selling apples, tomato plants, and lemonade. As is the case with most shopkeepers, they control every aspect of the business, including advertising and pricing decisions. In the process, they learn basic economic supply and demand concepts and the rudiments of the free enterprise system.

Designer Prints™

Ages 8 - Adult

This versatile tool is sure to become valuable and fun for your whole family! Use the convenient pull-down Apple IIgs menus to create wall-size posters up to 80" x 100", certificates, newsletters, letterheads, and more. Your only difficult task will be in deciding which of the many powerful, fun features to use in your designs! You'll have your choice of borders, a selection of graphics, and a variety of text styles. You can place graphics and text anywhere on the same page and have the option of either importing graphics from another source or producing your own. Use the work area on the screen and then zoom out to look at the entire piece in perspective. Then print your creation on an Epson®, Apple ImageWriter®, or Apple LaserWriter® printer. It's your choice. After all, you're the "designer"! Available Spring 1990.

Tools

Calendar Crafter™

Ages 11 - Adult

This powerful electronic calendar will help your entire family keep track of those important days—holidays, birthdays, anniversaries, vacations, and more. Design and print your own calendars for display anywhere in your home so that everyone will have special reminders of upcoming events, such as visits from relatives, dance or piano recitals, and Little League games. Choose from seven calendar styles, such as one day, one week, one month, or one year per page. Also included with *Calendar Crafter* is a wide selection of delightful graphics that help you add style and imagination to your calendars. A printer and an Apple IIgs computer with 768K of memory are required. A

winner of awards from *Classroom Computer Learning and Media & Methods*.

Exploring Microsoft® Works

Ages 12 - Adult

This product will help you to quickly learn to use the capabilities of *Microsoft Works 2.0*, one of the most popular software packages ever published for the Macintosh. Easy-to-follow activities and sample document files on disk help you learn about the word processor with its graphics and mail-merge capability, the database, the spreadsheet with its graphing function, and the communications program. Using this hands-on approach, you'll reap great dividends by learning to tap the power of this versatile software. Designed for individual study, *Exploring Microsoft Works* turns learning *Works* into play! *Microsoft Works 2.0* software must be purchased separately.

Exploring Desktop Publishing

Ages 12 - Adult

Have you ever had a need to send a professional-looking letter or resume, but you didn't want to send it to a typesetter because of the cost and slow turnaround time? Now, thanks to desktop publishing, all the tools to produce professional publications and documents are at your fingertips when you want them and at a cost to fit your budget. *Exploring Desktop Publishing* makes learning easy with a step-by-step manual focusing on page layout, graphics manipulation, and text importing and exporting. Designed for individual study, *Exploring Desktop Publishing* is the perfect way to learn desktop publishing. A Macintosh word processing program, Aldus PageMaker® Version 3, and a Macintosh Plus computer or greater with a hard disk are required and must be purchased separately.

Preschool - Age 8

First-Letter Fun™

Preschool - Age 6

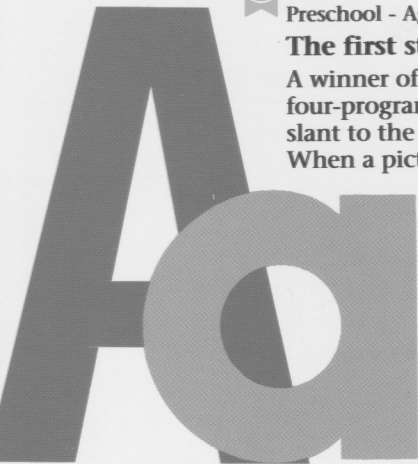

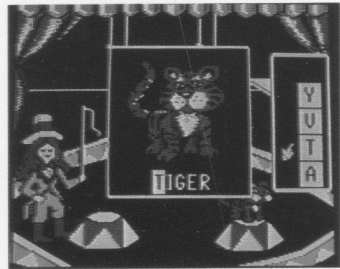

The first step in word recognition!

A winner of the *Parents' Choice Award*, this four-program package provides a delightful slant to the standard storytelling routine.

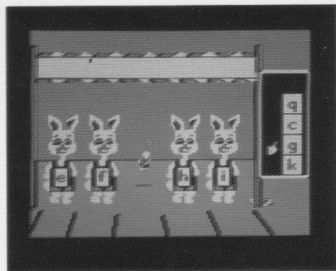

When a picture appears on the screen, kids pick a letter from a group of four that matches the beginning sound of the object shown. You can use either upper- or lower-case letters. Colorful animation provides hours of learning fun.

Fun from A to Z™

Preschool - Age 6

Letter-perfect excitement!

There are games and puzzles "from A to Z" in this package. Young children help songbirds find their way home and complete connect-the-dot puzzles while exercising their ability to distinguish letters, match upper- and lower-case forms, and recall alphabetic sequences.

Apple 64K

No. HAP164-3 (3.5" disk) \$39.95 No. HAP164-5 (5.25" disk) \$39.95

Paint with Words™

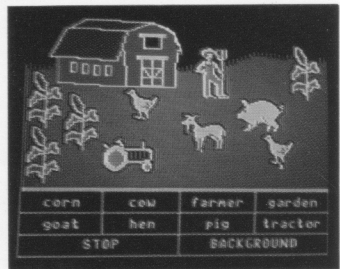

Preschool - Age 8

Help children *draw* their own conclusions!

As children learn to recognize simple words on sight, the words turn into pictures right before their eyes! Kids can then create their own computer "paintings" from these same words or word pictures. If you add the optional Jostens Ufonic™ Voice System to this widely acclaimed package, a natural-sounding voice gives students even more help in developing their vocabularies. This package is a winner of *The Family Computing Critics' Choice Award!*

Counting Critters™

Preschool - Age 6

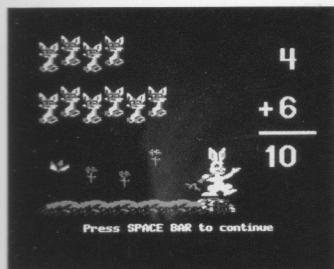

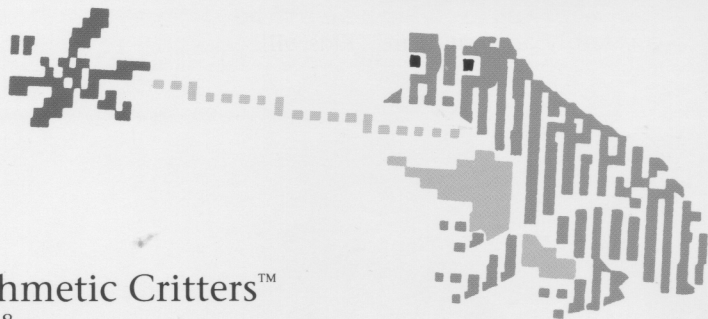

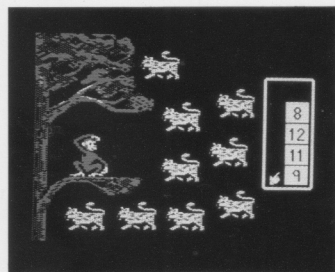

Kids will look forward to their first number lessons.

Fun games filled with lively graphics help kids practice basic number skills. Young students count animals on a safari, match identical numbers in a magic show, supply a pet store with the correct number of puppies, and much more as they learn how to work with numbers from 1 to 20. Several management options allow kids with different keyboarding capabilities to use this challenging package.

No. HAP165-5 (5.25" disk) \$39.95

Arithmetic Critters™

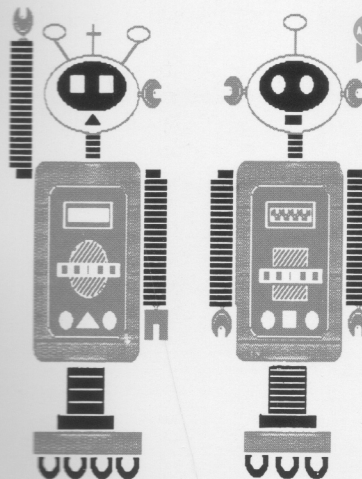

Ages 5-8

Continue the "critter" challenge!

Once children have successfully learned basic numeric skills with *Counting Critters*, they are ready to advance to this delightful package. Four imaginative programs help youngsters master simple math skills. Students practice drills on place values to 99, single-digit addition and subtraction, and basic measurement. Instructive feedback with each program gives additional help to children having difficulty.

Apple 64K

No. HAP166-3 (3.5" disk) \$39.95 No. HAP166-5 (5.25" disk) \$39.95

Patterns

Ages 5-7

Help kids develop sound reasoning patterns.

Cosmic space is the setting for this stimulating package of four programs designed to plant the seed for good math and science reasoning. Young children experience patterns both visually and aurally and discover how to recognize and extend linear patterns. They also learn how to apply these newly developed skills to create their own original patterns while they're entertained by intergalactic creatures. A *Classroom Computer Learning Award*-winner!
