CLIP ART 3-PACK

The *Clip Art 3-Pack* consists of over 1500 full-color pictures and images which are easily imported into your favorite Apple IIGS paint, publishing or hypermedia application. Each graphic is available in both 320-mode and 640-mode versions. For a preview of the images you'll find in each file, you can browse through the rest of this manual. To see the many masterworks contained in the *Clip Art 3-Pack*, load them into your computer and view them on the screen.

To work with the clip art graphics, you'll need an Apple IIGS application which is capable of using Apple-preferred format Super High Resolution Graphics. A short list of such applications would include Platinum Paint (320 or 640 mode), PaintWorks Gold (320 or 640 mode), Deluxe Paint II (320 mode), HyperStudio (640 mode), HyperCard GS (640 mode), AppleWorks GS (640 mode), GraphicWriter (640 mode), and Publish-It! 4 (320 or 640 mode). The exact steps for importing an image will vary slightly from application to application so refer to the application's manual if you need help.

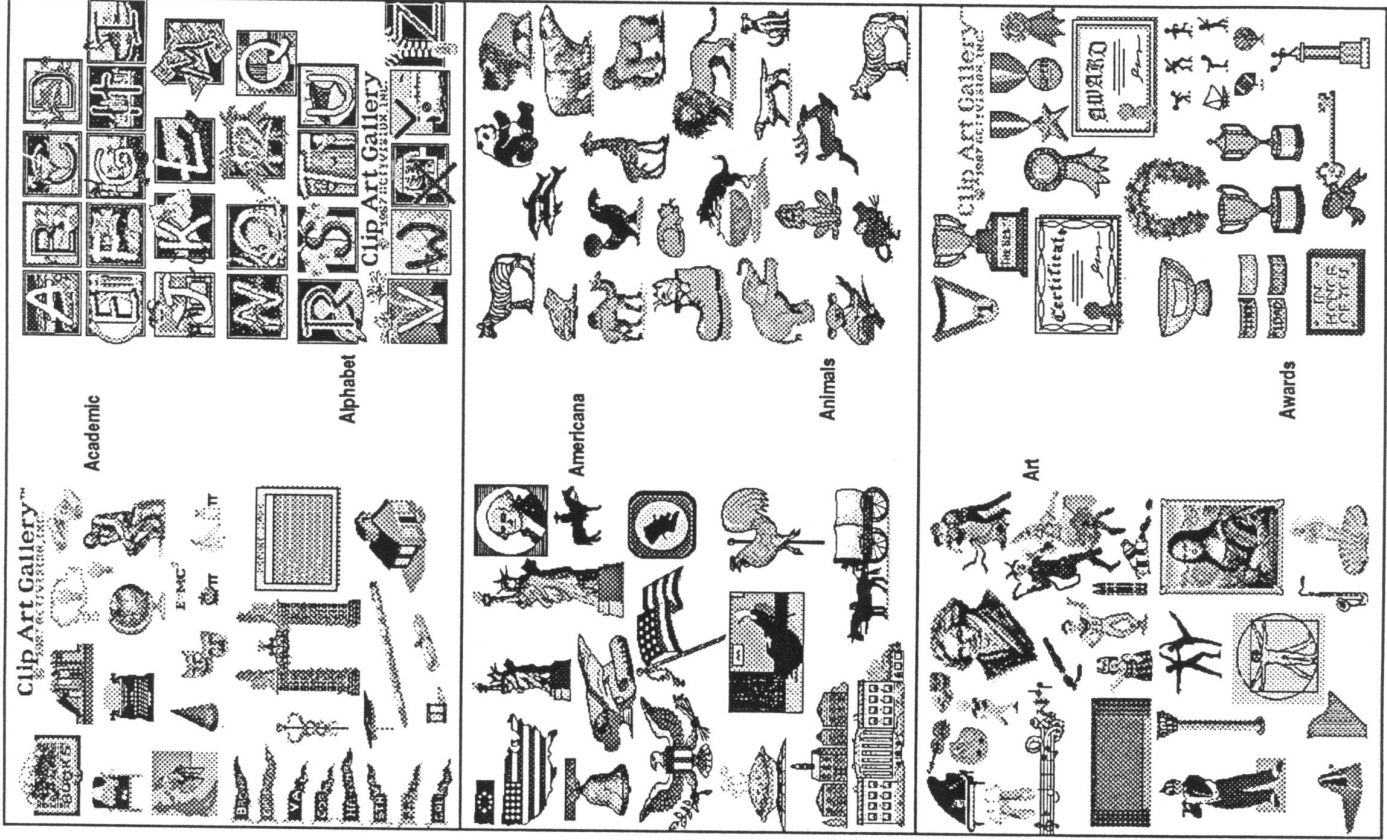

All of the clip art images were originally created in the 320-mode format. Because several popular Apple IIGS applications require 640-mode graphics, we have supplied the graphics in both 320 and 640 mode formats. Most graphics convert from 320 to 640 mode quite well. However, conflicts in the palettes will occasionally cause poor results.
